OUTDOOR INFRARED HEATER

WIFI + REMOTE CONTROL | 4 POWER LEVELS | TIMER FUNCTION | FAST HEAT | QUIET OPERATION

Termofol infrared heaters are modern heating devices designed for outdoor and semi-open use. They utilize far infrared radiation technology, which directly warms people and surfaces rather than the surrounding air. The aluminum heating panel ensures an immediate heat output, while operation and power adjustment can be conveniently managed via remote control or the Termofol Smart (Wi-Fi) mobile app. The IPX4-rated housing provides moisture resistance and safe operation in outdoor environments.

Technical specifications

WIFI

Model	Power	Rated Current(A)	Voltage (V)	Cable length (m)	IP	Dimension (mm)	Weight
TF-IR1000	1000W	4.3	220-240	1.8	IPX4	693×151×52	3.4 kg
TF-IR2400	2400W	10.4	220-240	1.8	IPX4	1593×151×52	7.6 kg
TF-IR3200	3200W	13.9	220-240	1	IPX4	2093×151×52	9.9 kg

Recommended conditions of use

Ambient temperature: -30°C ~ +40°C
Rated voltage: 220-240 V~
Rated frequency: 50Hz/60Hz
Relative humidity: less than 95%
